

Mindjet® MindManager® Basic 6

The Easiest Way to Organize Your Ideas and Information

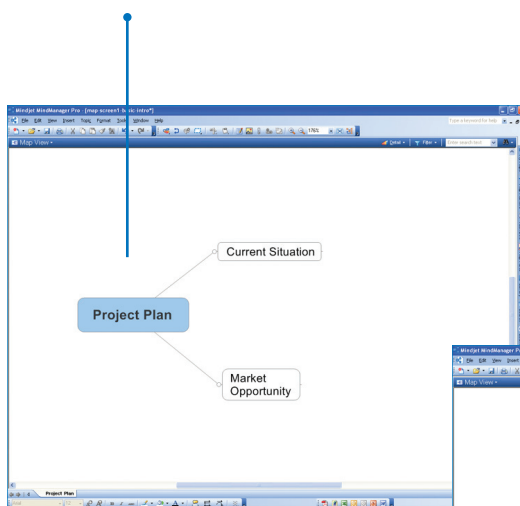

Mindjet® MindManager® Basic 6 helps individuals visualize information. Maps, created in MindManager software, help users quickly develop ideas, understand complex issues and relationships, and identify next steps. Using a simple graphical user interface, users can easily capture, organize and share ideas generated in planning and brainstorming sessions, meetings and classrooms.

With Mindjet MindManager Basic 6 You Can:

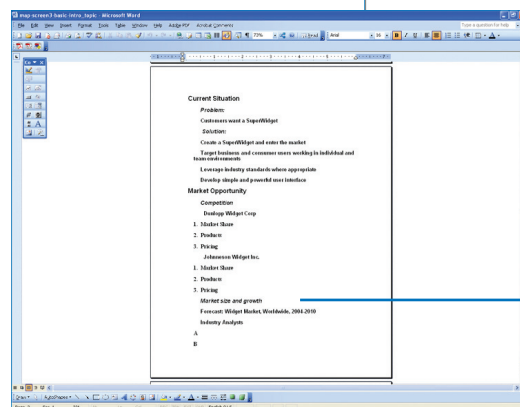

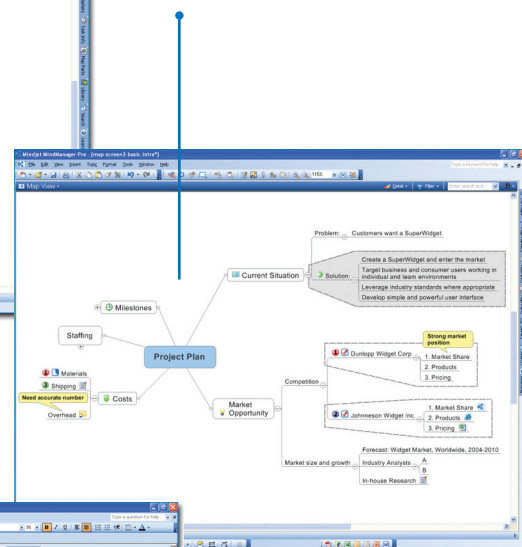

- Easily organize your ideas and information
- Increase your productivity
- Enhance the quality of strategic thinking

How MindManager Works

1. Start a new MindManager map by entering the name of your central topic. Next add the rest of your main topics. Add sub-topics to drill down to a lower level of detail. Drag and drop topics to quickly reorganize information.

2. Add icons and images to your maps for greater clarity and impact.

3. Leverage your map in other formats by exporting it to Microsoft Word® or as a Web page.

"There is no way I could be as productive without MindManager. In terms of the amount of work I can generate, I'm convinced that MindManager has been a substantial boost to my career."

Professor Jerry Kang, UCLA School of Law

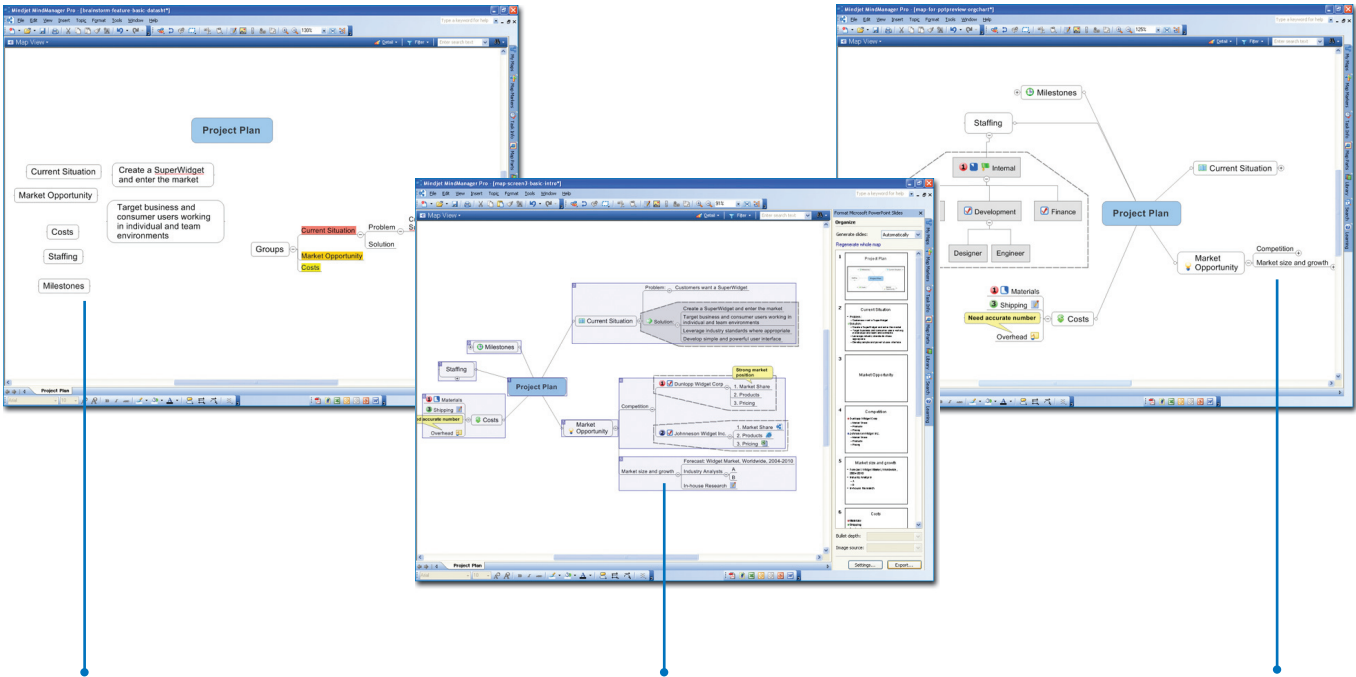

"MindManager improves our ability to think strategically and creatively about our work. People really respond when we work with them using MindManager."

Jimmie West, PhD, Vice President and Dean, PM College

"Anytime my VP asks me to come up with a project plan, budget or report - any work assignment, the first thing I do is open up Mindjet MindManager and start brainstorming. The way it displays information visually really helps me think faster and clearer about the task at hand."

Robert Holt, Manager of Technical Operations, National Public Radio

Key New Features in Mindjet MindManager Basic 6
